

Inquiry Form

Ore Dressing and Mineral Processing (a decline in the price, temporary suspension)

Information on the owner of the ore dressing or processing unit permit (establishment license, exploitation license):

Natural People:

Information about the owner of the exploitation permit:

Name and Surname:

ID Number:

Issued from:

Father's name:

Date of Birth:

Place of Birth:

National ID Number:

Legal People:

Firm/Company:

Number and Establishment Date:

A copy of the article of the association and the newspaper has to be attached.

Address and Phone Number, Fax, E-mail:

2. Information on the operation unit:

Name of the operation unit:

Unit Type: Ore Dressing Mineral Processing

Permit Type: Establishment License

Exploitation Permit

Date and Number of the Permit:

Validity duration: ... years.

Place and location of the operation unit:

Province:

City:

District:

Village:

Address and scheme of the region:

Name and information on the products:

Annual Production: ... tons

Type, amount, and carat of the material or the basic mineral needed:

Type and amount of any subsidiary material needed during the process:

The amount of the investment:

Fixed investment:

Working capital:

Total:

Machinery costs:

Imported machinery: ... dollars, equal to ... Rials

Non-imported machinery: ... Rials

Total:

Area: ... m²

Foundation Area: ... m²

The amount of electricity used by the unit: ... kW per day

The amount of water used by the unit: ... m³ per day

Please explain about the water sources.

Type of the fuel used by the unit:

The amount of the fuel used by the unit:

Please explain about the fuel sources.

Final price of the product: ... Rials per ton

The average price: ... Rials per ton

The estimated number of working shifts: ... shifts

The production efficiency of the working unit: ... %

There should be attached the flow sheets of the operation along with mass distribution, carats and efficiency measurements.

3. Technical Manager

Name and Surname:

Number and date of the permit:

Field of study:

Score:

Professional working background:

Address:

Phone number:

E-mail:

4- Have you ever had any mining activities?

Yes

No

If yes,

What kinds of activities did you have?

Exploring

Extracting

Processing

What kind of material or mineral did you work with?

For how long did you do mining activities?

Which Province did you do these activities in?

Have you been successful in the mentioned activities?

Yes

No

If No, please explain why.

5. Information on the mines providing the raw material:

Name of the mine(s):

The distance between the mine(s) to the operation unit: ... km

The price of the raw material brought into the operation unit (in the unit): ... Rials per ton

6. The current state of the project:

- Nothing has been done yet
- Construction state
- almost finished
- Experimental Production state
- Exploitation

If the project is in the construction state, what amount of the physical work has been done? ... m³ which equals ... % of the whole project.

How much money is been spent until now? ... Rials which equals ... % of the whole investment.

Has the Natural Environment agreed to the construction of the operation unit?

- Yes
- No

Please explain.

Has there been predicted any precautions regarding the environmental rules during the construction and exploitation?

- Yes
- No

If yes, which organization has confirmed it?

Which standards has the work reached?

- Iran
- Global

1-3 years							
No working experience							
Total							

What are the costs sources (investments)?

- Private
- Loan
- Co-ownership

If you have requested for a loan, the amount requested is ... Rials, of which ... Rials have been granted.

- The requested loan is in the is being considered.
- The requested loan is still in the offering stage.

Have you had any problems in getting the loan?

- Yes
- No

Please give a brief explanation.

Do you have any plans for developing the project?

- Yes

No

If yes, what is this plan referring to?

Increase in production

Improving the quality of the products

Modifying the production line

Please give a brief explanation.

In the developing plan, is there any idea regarding the material quality and exploitation improvement?

Yes

No

Please give a brief explanation

Has there been any safety threatening cases in the ore dressing or processing region?

Yes

No

If yes, why and for how long?

The mining activity area has been subjected to which of the events mentioned below?

Earthquake

Flood

Landslide

Natural Environment

Natural Resources

Police

Local People

Other

If yes, how much was the damage?

What technical or safety measurements have been taken into account in order to decrease the damages from accidents?

The safety measurements already done:

The safety measurements predicted to be done:

Has the unit, being exploited, ever been suspended because of economic reasons?

Yes

No

The reasons behind price decline:

Imports

A change in quality

Practical change or replacement with other material

A decline in the global price

Other reasons (please state what the other reasons are)

The reason behind the temporary suspension:

- Natural environment
- Natural Resources
- Police
- Local People
- A change in macro policies and rules of the country
- The operation area not being safe enough
- Earthquake
- Flood
- Landslide
- Explosion
- Collapse
- Fire
- Water inundation
- Other reasons (please estate the other reasons)

If yes, please explain, when, where, and why, and please start from the most dangerous to the least dangerous one.

According to you, which of the possible dangers mentioned below can be a reason to suspend the mining activity?

- A change in macro policies and rules of the country
- The operation area not being safe enough
- A disagreement with the local People

A disagreement with the execution organizations:

- Natural Environment

Natural Resources

Police

Natural disasters:

Earthquake

Flood

Landslide

Explosion

Collapse

Fire

Water inundation

A decrease in the price:

Imports

A change in the quality

A practical change or replacement

A decrease in the global price

Other reasons (please state the other reasons)

Please list the above mentioned dangers from the most dangerous to the least dangerous.

What technical or safety measurements have been taken into account, or will take place in the future, in order to decrease or stop the above mentioned dangers?

Your offer regarding the compensation for the damages caused by the temporary suspension or a decline in the price:

In case of temporary suspension:

The longest insurance coverage within the time that the insurance policy is still valid: ... days.

Your offer to compensate the damage for each day during the suspension: ... Rials

In case of a decline in the price:

The longest insurance coverage within the time that the insurance policy is still valid: ... days.

Your offer to compensate the damage caused by a decline in the price for the production unit from ... Rials to ... Rials.

I announce here, that all the questions in this inquiry has been answered honestly and with total awareness.

The owner of the exploitation permit:

Stamp and Signature:
